ABOUT MICA SHIELD

Founded in 2024 in Muscat, Mica Shield is an Omani cybersecurity firm built by working penetration testers.

We test web, mobile, cloud and internal networks, run red team exercises, and help teams build a security programme they can actually keep running.

Every report is written to be used: findings ranked by real business risk, and fixes your engineers can follow without a translator.

BUILT FOR PARTNERSHIP

We lead the engagement and bring in specialists when your scope needs them

WHAT WE DO

Penetration testing

We attack your systems the way a real attacker would, then show you exactly where to close the gaps.

Web · Mobile · Cloud · Network · Internal · IoT · OT · DDoS
· Phishing

ISMS and compliance

ISO 27001 aligned policies, controls and audit readiness, shaped around how your team already works.

Gap assessment · Policy set · Controls · Audit support

Red teaming

A goal driven simulation that tests your people, your process and your technology at the same time.

Full scope · Stealth · Detection and response check

Training and awareness

Hands on training that turns staff from the weakest link into the first line of defence.

Technical labs · Staff awareness · Phishing drills
